Vessel *Sinks*

Natural stone basins, carved from a single block

FOUR SURFACES · ONE PLATFORM · Ø420 × 150 MM

AFYONKARAHİSAR · TÜRKİYE

One block.
Four surfaces.

Every basin in this collection begins as one solid block of travertine. A robotic arm carves the outside surface in a single continuous pass around the bowl, so the pattern wraps a full 360° with no seam and no starting point. The inside is finished by hand.

All four designs share the same bowl, the same rim and the same drain. Only the outside changes. For you this means one countertop cut-out, one waste fitting and one set of installation instructions for the whole range.

01 Never moulded
Solid stone, cut from the block. No resin, no casting, no joints.

02 Seamless pattern
The carving runs all the way around without a visible start or end.

03 One platform
Identical inner bowl, rim and drain on every model.

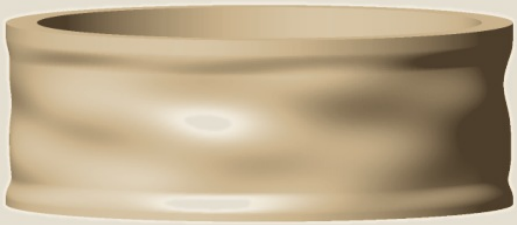

04 Your travertine
Beige to cream tones. Tone and veining approved from a sample.

Shared by all four models · dimensions in mm

SECTION

PLAN

SPECIFICATION

OUTER SIZE	Ø420 × 150 mm
INNER RIM DIAMETER	Ø368 mm
RIM THICKNESS	26 mm
INNER DEPTH	120 mm
BASE THICKNESS	30 mm
INNER FILLET	R70 mm
DRAIN	Ø45 mm
OVERFLOW	None
FLOOR FALL TO DRAIN	5 mm
RIM EDGE	0.8 mm chamfer
RAW BLOCK	440 × 440 × 160 mm

INSTALLATION

Countertop mounting

Sits on the worktop over a single Ø45 mm waste hole. No overflow: use a free-flow or click-clack waste without overflow slot.

Cabinet height

A cabinet height of 75–80 cm is recommended so the rim sits at a comfortable 90–95 cm.

Care

Surface sealed with impregnator before delivery. Clean with pH-neutral products; avoid acidic cleaners.

01 Twisted Flute

Eighteen flutes that turn as they rise

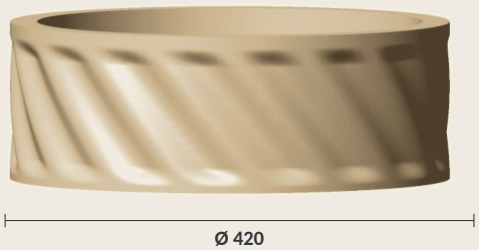

Visualisation of the 3D production model in honed travertine · natural veining varies block by block

DESIGN

The classic fluted bowl, taken somewhere a lathe cannot go. Eighteen flutes run the height of the body and twist 34° on the way up, so the surface seems to turn as light moves across it.

ELEVATION

MODEL DATA

PATTERN	**18 flutes · 34° twist**
FLUTE DEPTH	**8 mm**
THINNEST WALL	**18 mm**
STONE VOLUME	**8,926 cm³**
WEIGHT IN TRAVERTINE	**approx. 21.9 kg**
OUTER SIZE	**Ø420 × 150 mm**
STONE	**Beige travertine**
FINISH	**Honed**

Platform dimensions on page 03

02 Organic Wave

A free wave that never repeats

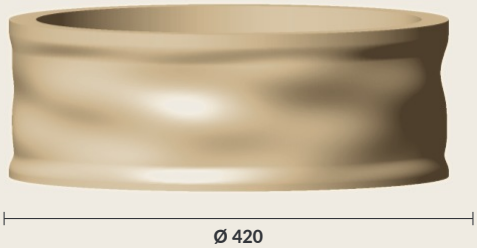

Visualisation of the 3D production model in honed travertine · natural veining varies block by block

DESIGN

A soft, irregular wave wraps the whole body without a seam. There is no front and no back: the silhouette changes from every angle, like a stone shaped by water.

ELEVATION

MODEL DATA

PATTERN	**Free wave · seamless 360°**
PATTERN DEPTH	**8 mm**
THINNEST WALL	**18 mm**
STONE VOLUME	**8,925 cm³**
WEIGHT IN TRAVERTINE	**approx. 21.9 kg**
OUTER SIZE	**Ø420 × 150 mm**
STONE	**Beige travertine**
FINISH	**Honed**

Platform dimensions on page 03

03 Ripple

Rings spreading from a single point

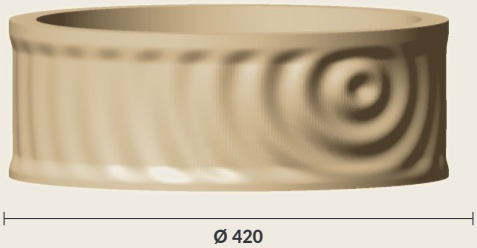

Visualisation of the 3D production model in honed travertine · natural veining varies block by block

DESIGN

Water rings spread across the body from one focal point, as if a drop had just landed on the stone. The most expressive piece in the collection and the one that asks the most of the carving.

ELEVATION

MODEL DATA

PATTERN	**Single-focus rings**
RING SPACING	**approx. 22 mm**
PATTERN DEPTH	**8 mm**
STONE VOLUME	**8,924 cm³**
WEIGHT IN TRAVERTINE	**approx. 21.9 kg**
OUTER SIZE	**Ø420 × 150 mm**
STONE	**Beige travertine**
FINISH	**Honed**

Platform dimensions on page 03

06 Graded Rings

Horizontal rings in a tightening rhythm

Visualisation of the 3D production model in honed travertine · natural veining varies block by block

DESIGN

Horizontal rings circle the body and draw closer together towards the rim. A contemporary reading of the turned stone bowl, quiet enough for any bathroom.

ELEVATION

MODEL DATA

PATTERN	**Horizontal rings · graded**
RING DEPTH	**8 mm**
THINNEST WALL	**18 mm**
STONE VOLUME	**8,966 cm³**
WEIGHT IN TRAVERTINE	**approx. 22.0 kg**

The *classics*

Alongside the carved collection we make the two forms your customers already know, cut from the same travertine blocks. Sizes are made to order; Ø400–420 mm is the usual starting point.

BM-CL-01

Travertine · honed

Round Bowl

The timeless round basin in beige travertine. Smooth inside and out, thin rounded rim, no overflow.

BM-CL-02

Travertine · honed

Fluted Bowl

Straight vertical flutes around the body, plain honed interior.

Visualisations. Natural stone varies in tone and veining; dimensions and weights are confirmed with each quotation.

Stone and *finish*

Beige travertine
Warm beige to honey with natural horizontal veining.

Cream travertine
A lighter, calmer tone of the same stone.

Finish
Honed matte. Open pores filled, or left natural on request.

Colour blocks are indicative only. Every block is different; tone and veining are approved from a photo or sample before production.

PRODUCTION

Made to order in beige or cream travertine.

Block selected and approved before carving.

Lead time counted from order approval.

PACKING

Timber crate with foam and felt lining.

Content form and installation sheet in every crate.

Export standard packing.

TERMS

Prices given by separate quotation, VAT excluded.

Ex-works Afyonkarahisar by default.

Other delivery terms quoted on request.

EXCLUSIVE DESIGNS

A shape of your own

Have a form in mind that you cannot find on the market? Send us a sketch, a photo or a few words. We model it in 3D, agree the dimensions with you and produce it for your brand only.
